

Dear Sir,

First let me say please excuse my writeing faults for i do not write very often.

I am a stockholder/investor/part owner of this Co. Global Crossing

I write you to request not to allow this fiber optic network to be sold to a foreign country connected owner.

This fiber network is so very valuable, its value cannot be even imagined at this time. This is an American Product built by Americans and should not be allowed to be legally stolen by a foreign Co.

I am just one of many that feel this way, I invite you to view AOL, Earthlink, Lycos message boards for thousands with same opinion.
